SUMMARY

Fourth-year BSc (Hons) Software Engineering student at the University of Kelaniya (GPA 3.26/4.0), specializing in full-stack web development with a strong command of modern ecosystems including React, Next.js, NestJS, TypeScript, and Node.js. Passionate about building scalable, maintainable systems with clean code and excellent user experience. With recent hands-on experience in building AI-integrated platforms, cloud deployments, and monorepo and microservice architectures, I am seeking an Associate Software Engineer position to contribute to high-impact projects in a collaborative environment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn
Backend & Frameworks: Node.js, Express.js, NestJS
Databases: PostgreSQL, Prisma, MongoDB, MySQL
Cloud & Deployment: Docker, Google Cloud Platform (Cloud Run, S3 Buckets)
AI & Engineering: Vertex AI, Prompt Engineering, Vector Embeddings
Tools & Platforms: Git, GitHub, Turborepo, Jira, Trello, Postman, Supabase
Methodologies: REST APIs, GraphQL, Microservices, RBAC, OOP, JWT Authentication, Agile/Scrum

WORK EXPERIENCE

Junior Software Engineer | *Future Life Investment Limited* Jan 2026 – Jul 2026

Developed and architected critical features for the Snap super app ecosystem, specifically focusing on e-commerce and AI-native jobs marketplace platforms.

- **SnapJobs (AI-Native Jobs Marketplace):** Architected and built a full-stack AI jobs marketplace as a Turborepo monorepo with three Next.js frontends (seeker, recruiter, admin) and a NestJS API.
- Engineered an AI-powered CV-to-job matching engine using vector embeddings (text-embedding-005) and domain-aware scoring profiles, validated by a golden-test framework.
- Implemented secure cookie-based authentication with OTP email verification, dual-role accounts, and RBAC, plus a credits system.
- Developed an automated CV extraction pipeline (PDF parsing, OCR fallback) and deployed to Google Cloud Run via Docker.
- **Snap (Multi-Vendor E-commerce):** Built a full-stack product review system end-to-end: a custom Vendure/GraphQL plugin supporting verified purchases and variant-level ratings with S3 image uploads.
- Optimized review performance by caching aggregated stats in product fields and applying DataLoader batching, eliminating N+1 queries.
- Developed a weight-based shipping engine with database-driven rates exposed over GraphQL for real-time delivery-cost estimates.
- Implemented merchandising collections with category filtering and a bank-transfer checkout flow with WhatsApp integration.
- Hardened a server-side image-upload proxy to strictly allowlist trusted cloud storage origins, preventing SSRF.

EDUCATION

University of Kelaniya

July 2023 – Present

B.Sc. (Hons.) Software Engineering (Current GPA: 3.26/4.0)

Specializing in Full-Stack Web Development, MERN Stack, Database Technologies, and Responsive Web Applications.

Prince of Wales College, Moratuwa

July 2019 – Feb 2022

G.C.E. Advanced Level (Z-Score - Maths Stream: 1.6789)

PROJECTS

CBC E-commerce Platform - Full-Stack Web App (Individual) | *React, Node.js* July 2025 – Oct 2025

[Github Frontend](#) | [Github Backend](#) | [View Live](#)

- Developed a complete full-stack e-commerce application with responsive UI, shopping cart functionality, user authentication, and admin dashboard for product and order management.
- Implemented secure user login system and product management APIs using Node.js and Express.js, enabling real-time product updates and order processing.
- Designed responsive user interface with React and Tailwind CSS, improving mobile usability and overall user experience.
- Deployed backend APIs for seamless customer transactions and administrative control over inventory and orders.

Fuel Management System - Web Application (Group) | *React, Spring Boot*

Jan 2025 – Feb 2025

[Github](#)

- Built a fuel management web application with stock tracking, transaction reports, and JWT-based secure authentication for role-based access control.
- Developed RESTful APIs in Spring Boot for managing fuel inventory, transactions, and generating reports, improving data retrieval and system efficiency.
- Collaborated with team members using Git and Jira to plan sprints, track tasks, and maintain code quality in an Agile development environment.
- Implemented role-based access control ensuring different permissions for admins, operators, and managers.

Personal Portfolio Website (Individual) | *React, CSS, JavaScript*

Nov 2025

[Github](#) | [View Live](#)

- Created a responsive personal portfolio website showcasing skills and projects with smooth animations, interactive navigation, and a functional contact form.
- Ensured cross-device compatibility and fast loading speed to provide a good user experience.

CERTIFICATIONS & COURSES

- Full-Stack Web Development (MERN) - Participation | [View Certificate](#)
- Full-Stack Web Development (MERN) - Project Completion | [View Certificate](#)
- Programming with JavaScript - Meta (Coursera) | [View Certificate](#)
- Introduction to DevOps - IBM (Coursera) | [View Certificate](#)

EXTRACURRICULAR & UNIVERSITY EXPERIENCE

Web Developer | IT Unit, Leo Club of University of Kelaniya

Oct 2022 – Present

- Develop and maintain web applications and internal tools for university departments.
- Work on bug fixes, feature enhancements, and code reviews using Git and best practices.

Programme Team Member | IEEE Day 2024, University of Kelaniya

Oct 2024

- Supported planning and coordination of IEEE Day technical events and sessions for students.
- Assisted with event logistics, communication, and participant engagement.

Wrestler | University of Kelaniya

Dec 2023 – June 2025

- Compete at university-level wrestling events, demonstrating discipline, resilience, and commitment.

Cricket Player | Prince of Wales College

June 2014 – Aug 2016

- Represented school cricket team, building teamwork, communication, and leadership skills.
